

SUMMARY

Senior Product Designer with 5+ years designing enterprise SaaS, dashboard, and billing platforms end-to-end — from research and UX strategy through **design systems**, prototyping, and dev handoff. Proven track record building and scaling **reusable component libraries**, running research programs (moderated/unmoderated testing, heuristic reviews), and translating complex business rules into clear, accessible (**WCAG**) UX systems. Comfortable operating in **Agile/Scrum** teams, presenting design rationale to stakeholders, and owning delivery independently across geographies.

CORE SKILLS

Design & Systems	Design Systems, Material UI, UI Design, Design Principles, UX Documentation
Tools	Figma, Adobe XD, Adobe Illustrator, Sketch, InVision, Axure RP, Zeplin, Flinto, Miro, Balsamiq, Framer
Research	User Interviews, Moderated & Unmoderated Testing, Heuristic Reviews, Qualitative & Quantitative Research, UCD
Delivery	Wireframing, Prototyping, Userflows, Information Architecture, Responsive & Interactive Design, WCAG Accessibility
Ways of Working	Agile / Scrum, Stakeholder Communication, Cross-Functional Collaboration
Platforms	Exposure to Adobe Experience Manager (AEM) and CMS-driven content/publishing workflows

WORK EXPERIENCE

Senior Software Engineer — <i>Infovision Labs, Hyderabad, Telangana</i> <i>Projects: Digital API – Verizon</i> - Partner with cross-functional agile teams to define user stories and UX deliverables that translate directly into business requirements. - Shape design and product decisions for enterprise dashboard applications, driving visual style, interface layout, and interaction flows end-to-end. - Produce conceptual diagrams, wireframes, visual mockups, and interactive prototypes to align stakeholders ahead of build. - Work alongside developers from concept through implementation, iterating on the most effective and efficient UI solutions. - Own design discussions and final UI handoff, embedding usability best practices at every stage of delivery. - Competed in VCODEHAX2025 – AI DPro (AI-powered Data Processor), rapidly iterating designs through hypothesis-driven testing.	May 2025 – Present
Associate – UX/UI Designer — <i>PurpleTalk India Private Limited, Hyderabad, Telangana</i> <i>Projects: Godrej Agrovet, Billing Management System (BMS), Culture of Fit</i> - Defined user stories and UX deliverables in an agile setup, aligning design work with project KPIs across cross-functional teams. - Ran 30+ user interviews and moderated usability tests, analyzing and actioning feedback to continuously refine deliverables. - Presented design recommendations to stakeholders backed by UX best practices, research data, and business requirements. - Designed wireframes, prototypes, and interaction flows, and maintained full UX documentation — navigational flows, use cases, task flows, and system error states. - Built and maintained a design system with 100+ reusable components, including detailed specifications and design patterns. - Translated business rules and assets into scalable UX systems and enterprise solutions. - Collaborated closely with developers on efficient implementation, providing timely status reporting across all projects. - Advocated for the user by partnering with business owners on features and flows aligned to real user needs. - Built research strategies tied to project KPIs, formulating usability test plans, scripts, and scenarios.	Nov 2023 – Jan 2025

- Delivered projects at a **95% on-time success rate**, managing all cross-team communication required to ship.

Software Engineer – UX Designer — *Wavelabs Technologies (50K SAAS Ventures), Westagile, Hyderabad, Telangana* Sep 2022 – Jul 2023

Projects: *Cooper (SaaS Product), Presence Sleep*

- Used heuristic reviews, user interviews, and remote unmoderated testing to evaluate ease-of-use and comprehension of designs.
- Designed **20+ wireframes and 10+ prototypes**, plus full UX documentation (navigational flows, use cases, task flows, mockups).
- Formulated and tested hypotheses through design iterations, improving adoption and usability via evidence-based decisions.
- Ensured all designs followed **WCAG accessibility guidelines**, reinforcing strong user-centered design principles.
- Collaborated with developers in agile sprints from inception through implementation, achieving **90% successful delivery**.
- Designed, recruited, scheduled, and moderated usability studies and user interviews to validate design decisions.
- Led **5+ UX knowledge-sharing sessions** across teams, championing UX best practices organisation-wide.

UX Designer — *Orennow, Mumbai, India*

Dec 2021 – Aug 2022

Projects: *The Sustainability Hub*

- Partnered with the CEO and leads to gather requirements, translating business rules and assets into UX flows and enterprise design solutions.
- Defined UX strategy and designed **5+ end-to-end task flows and navigational structures**, reducing onboarding time by **20%**.
- Created a reusable **style guide with 50+ components**, developing and maintaining detailed UX specifications and design patterns.
- Designed flows, mockups, and interactive prototypes to support product development and stakeholder alignment.
- Managed all project communications, negotiating with key stakeholders and providing timely status updates through delivery.
- Delivered all projects on time, owning design decisions independently across geographical and cross-functional boundaries.

EDUCATION

Master of Business Administration — *Lovely Professional University, Jalandhar, Punjab*

2017 – 2019

B.Com (Computer Applications) — *St. Joseph Degree College, Kurnool, AP*

2013 – 2016
