VEMULA KONDOJU SAI KEERTHI

Senior Product Designer | UX Designer | AI & SaaS Products | Design Systems | HFI – CUA Certified

vksaikeerthi@gmail.com | +91 9618670515 | Hyderabad | Portfolio: keerthiux.github.io/portfolio | LinkedIn: keerthi-vemula-kondoju

Professional Summary

Senior Product Designer with nearly 5 years designing enterprise SaaS, data-dense dashboards and AI-powered workflows across telecom, billing, agritech and sustainability. Owns the full design lifecycle — research, IA, interaction design, Figma prototyping, design systems and design QA — with proven impact: a **100+ component design system**, **60% fewer steps to create an invoice**, **20% faster onboarding** and **30+ user interviews** led. Working knowledge of **HTML, CSS** and core front-end concepts, so designs are build-ready and easy for engineers to implement. Most recently designed **NexoraCRM**, a multi-tenant SaaS CRM for healthcare clinics, end-to-end as a freelance engagement, grounded in interviews with dental practitioners. HFI Certified Usability Analyst focused on WCAG 2.1 accessibility.

Skills

Product Design: End-to-End Product Design, UX Strategy, Product Discovery, Information Architecture, User Flows, Interaction Design, Visual Design, Responsive Design, Data-Dense Dashboards

UX Research: User Interviews, Moderated & Unmoderated Usability Testing, Heuristic Evaluation, Research Planning & Synthesis, Hypothesis-Driven Design, Personas, Journey Mapping

Design Systems: Component Libraries, Figma Auto Layout, Variants & Variables, Design Patterns & Specifications, Style Guides, Material UI, Design QA

Front-End (Working Knowledge): HTML5, CSS3, Flexbox & CSS Grid, Responsive Layouts & Media Queries, Semantic HTML & ARIA, Component-Based UI, Design Tokens & CSS Variables, Box Model & Browser Rendering, Browser DevTools

AI & Emerging UX: AI-Powered Workflows, Designing for AI Transparency & Trust, Human-in-the-Loop Patterns, Rapid Prototyping & Experimentation

Accessibility & Delivery: WCAG 2.1, Agile / Scrum, Stakeholder Management, Design Reviews & Critiques, Developer Handoff

Tools: Figma, Framer, Miro, Axure RP, Sketch, Adobe Illustrator, Balsamiq, Flinto, Jira

Work Experience

Senior Product Designer (Freelance)

NexoraCRM · nexoracrm.co — Jul 2026 – Present

Multi-tenant SaaS CRM for clinics and hospitals

- Led end-to-end product design for **NexoraCRM** — owning UX strategy, information architecture and the full UI of a multi-tenant CRM for appointment-based healthcare businesses.
- Interviewed **5 dental practitioners and clinic staff** (periodontists, a prosthodontist, a clinic assistant) to map daily workflows, appointment management and follow-up pain points.
- Designed core workflows for patient records, appointment scheduling and staff availability, consolidating notebooks, WhatsApp chats and spreadsheets into one dashboard.
- Designed **WhatsApp notification flows** for booking, cancellation and rescheduling, aimed at reducing no-shows and manual follow-ups.
- Narrowed the scope from a generic appointment CRM to healthcare, and made “Book Appointment” the single primary action on every screen.
- Collaborated with engineering from concept through build, including design QA on implemented screens.

Senior Software Engineer – Product Design

Infovision Labs · Hyderabad — May 2025 – Jul 2026

Project: Digital API – Verizon

- Owned end-to-end product design for Verizon’s Digital API platform — discovery and problem framing through high-fidelity design, developer handoff and design QA.
- Designed the information architecture, interaction flows and visual language for data-dense enterprise dashboards, simplifying complex API workflows for technical and business users.
- Designed the experience for **AI DPro (AI-powered Data Processor)** at VCODEHAX2025, applying AI UX patterns for transparency, feedback and human review of AI output through rapid hypothesis testing.
- Partnered with product managers and engineering leads in agile squads to turn business goals into user stories, success criteria and a prioritised UX backlog; presented design rationale in leadership reviews.
- Extended the Figma component library (auto layout, variants, variables) and ran design reviews to ensure consistent, accessible (WCAG 2.1) implementation.

Associate – UX/UI Designer
PurpleTalk India Pvt. Ltd. · Hyderabad Nov 2023 – Jan 2025
Projects: Billing Management System (BMS), Godrej Agrovet, Culture of Fit

- Redesigned a legacy billing & HRMS platform for PMOs, PMs and HR teams — **60% fewer steps to create an invoice** and **3× faster HR record lookup**.
- Built and scaled a design system of **100+ reusable components** with specs, patterns and usage guidelines — a single source of truth for design and engineering.
- Planned and ran **30+ user interviews** and moderated usability tests; wrote test plans and scripts and turned insights into prioritised design changes.
- Led UX for three client products across billing, agritech and fitness, translating complex business rules into clear enterprise workflows with full documentation of flows, edge cases and error states.
- Delivered with a 95% on-time rate, owning communication across product, business and engineering teams.

Software Engineer – UX Designer
Wavelabs Technologies (50K SaaS Ventures) · Hyderabad Sep 2022 – Jul 2023
Projects: Cooper (AI decision-making SaaS), Presence Sleep

- Designed Cooper, an AI-powered decision-making platform for data teams, from concept diagrams and wireframes to interactive prototypes and dev handoff.
- Evaluated usability through heuristic reviews, user interviews and remote unmoderated testing across a B2B SaaS product and a consumer sleep app.
- Designed 20+ wireframes and 10+ interactive prototypes with full UX documentation, meeting WCAG accessibility guidelines.
- Led 5+ UX knowledge-sharing sessions to raise design maturity across teams.

UX Designer
Orennow · Mumbai Dec 2021 – Aug 2022
Project: The Sustainability Hub

- Partnered directly with the CEO to define UX strategy and requirements for a sustainability platform, owning design decisions without a formal PM structure.
- Designed 5+ end-to-end task flows and navigation structures, **reducing onboarding time by 20%**.
- Created a reusable style guide with 50+ components and detailed UX specifications.

Certifications & Education

Certified Usability Analyst (CUA) — Human Factors International (HFI)

MBA — Lovely Professional University, Jalandhar 2017 – 2019

B.Com (Computer Applications) — St. Joseph Degree College, Kurnool 2013 – 2016
